

DL::DelegateBase

```
graph BT; A[DL::Functor6< ReturnType, Param1, Param2, Param3, Param4, Param5, Param6 >] --> B[DL::DelegateBase];
```

A UML class diagram illustrating inheritance. At the bottom, a class box for `DL::Functor6< ReturnType, Param1, Param2, Param3, Param4, Param5, Param6 >` is shown with a black background and white text. A solid blue arrow points vertically upwards from this box to a class box for `DL::DelegateBase` located above it. The `DL::DelegateBase` box has a white background and a black border.

DL::Functor6< ReturnType, Param1, Param2, Param3, Param4, Param5, Param6 >
